

## Year 1 - Autumn 2 Maths

*Here are some suggestions of activities to do at home with your child to support their mathematical understanding.*

### Number Sense:

- Count forwards and backwards to 100 and beyond. Challenge: choose a random number to start from
- Counting in 10s forwards and backwards to 100
- If someone else makes a mistake when counting, can you spot it?
- Compare different amounts using 'more than', 'less than' and 'equal to'

This term we are focusing on comparing numbers - can you compare heights or weights? Can you compare numbers with the same tens digit e.g. 42 and 48

### Every day Maths to complete at home:

- Baking or cooking activities - which ingredients do you have **more** of? Are any of the weights of the ingredients **equal**?
- Collecting cutlery for the table - if everyone has a plate, how many do you need? How many more spoons do you need?
- Completing puzzles - trial and error approach, changing the direction of puzzle pieces.
- Number or shape hunt - which room has more numbers in it, the kitchen or the living room?
- Share out sweets or fruit with your families, can you all have an **equal** amount? How can you make this fair?

Maths

These activities are a suggestion of what you could do, they are not limited and please do feel free to add your own learning!

Please return your book to class **Monday 14<sup>th</sup> November** so that we can record your progress so far and stick in homework tasks for Spring 1.
